

MANLIFT

Safe and efficient painting at heights

A study by the Ministry of Labour showed that the risk of falling is one of the most common causes behind accidents as most accidents involve the use of stairs or ladders. Aerial work platforms are a safer, more efficient and more comfortable alternative. With our extensive range available for sale and for rent we have solutions available for all types of painting work at height.

Taking You to New Heights Safely

“Manlift has been a reliable supplier for many years for us that provides qualitative aerial platforms, quickly and professionally”

22 metre telescopic aerial platform

Machine weight	13,115 kg
Drive	4 x 4 Diesel

26 metre articulated boom lift

Working height (max)	26.20 m
Lifting capacity (max)	230 kg
Horizontal reach (max)	15.75 m
Machine weight	15,500 kg
Drive	4 x 4 Diesel

21 metre scissor platform

Working height (max)	21.50 m
Lifting capacity (max)	750 kg
Own weight	4,370 kg
Propulsion (engine type)	diesel

spider platform

Working height (max)	35.50 m
Lifting capacity (max)	200 kg
Horizontal outreach (max)	15.60 m
Own weight	4,850 kg
Propulsion (engine type)	diesel

Painting comfortably at heights

The quality of your paintwork is in part determined by the working conditions. It is safer to work on an aerial work platform and it is also more comfortable than a stairway or ladder, for instance.

- With our wide range you can easily paint even the hard-to-reach points at heights.
- We have a wide range of telescopic and articulated boom lifts available to properly position the basket so you can comfortably paint at heights.

Manlift, your partner for painting projects

Manlift has been specializing in various fields of working at heights safely and efficiently over more than ten years, including the painting industry.

- We will gladly assist you in finding the right solution, even during the calculation and quotation phase.
- For specific applications Manlift can add accessories and make modifications such as particle filter, generators, lighting and a GPS tracking device.

Quality and safety

Manlift conducts a rigorous quality policy. Our equipment is distinguished by their quality and good operating condition. Machines are inspected before delivery and approved annually.

- ISO certification
- Training centre for custom operator training
- Tested, inspected and cleaned machines from top brands such as JLG, GENIE and TEUPEN
