MANLIFT

“Working at Height Safely and Efficiently” Training

Taking You to New Heights Safely

WORKING SAFELY AND EFFICIENTLY AT HEIGHT WITH MANLIFT

Manlift's culture continuously reinforces the importance of working at height safely and efficiently. This applies to our own employees and our customers. We understand how important it is for your teams to receive not only the required training but also to receive appropriate training delivered and assessed by competent and accredited Training instructors.

Manlift uses certified training centres and qualified and certified Training Instructors. Manlift has partnered with **"The International Powered Access Federation" (IPAF)** and the **"Prefabricated Access Suppliers' & Manufacturers' Association" (PASMA)** to offer you recognized and trusted solutions for your training needs. We can provide tailored training courses at our registered training centres, or we can come to you if you prefer. Some of the training solutions we provide are:

- Mobile Elevating Work Platform (MEWP) Training for operators
- Mobile Elevating Work Platform (MEWPs) Training for Managers
- Mobile Elevating Work Platform (MEWP) Training for Demonstrators
- Safety Harness and Lanyard training for MEWPs
- Loading – Transporting – Unloading training for those involved in the delivery & collection of MEWPs
- Mobile Aluminum Access Towers for users Training
- Professional advice on access equipment, and its applications; via phone, email, site Survey or the WEB that you can rely on to guide you with any questions that you may have.

All of our training courses are designed and delivered so your teams efficiently and effectively understand how to safely operate and manage the access equipment you have chosen to add value to your business.

MOBILE ELEVATING WORK PLATFORM TRAINING

Manlift is a leading supplier of Mobile Elevating Work Platforms (MEWPs). We are the market leader in *multiple* countries for sales and rental of Mobile Elevating Work platforms, serving every kind of enterprise, from local to multinational across various industries. In addition, we have various types of training that provide competence based results for your employees to enable them to operate mobile elevated work platforms safely and securely. These training modules can be given at four locations: Dubai / Abu Dhabi (UAE), Doha (Qatar) Noida & Gujarat (India). In addition, the courses can also be given on site.

IPAF "MEWP OPERATOR TRAINING" - "POWERED ACCESS LICENSE (PAL CARD)

The correct selection and use of MEWPs is one of the best ways, to ensure safe work at height; therefore it is important that all operators undergo an accredited course delivered by trained Instructors to ensure they have the knowledge and skills required to prevent accidents. Manlift has qualified IPAF instructors to provide this training and instruction for your teams. The training module we use meets or exceeds all applicable standards, rules and regulations.

This course imparts the required knowledge to an operator and evaluates the trainee for pre & post training knowledge and competency.

The operator course ensures the Operator can prepare and safely operate various types of MEWPs. (Refer bullet list below)

- Health and safety regulation awareness
- Hazard awareness & Accident prevention and control
- Personal Protective equipment
- Equipment operator manual use.
- Driving, positioning, maneuvering a MEWP
- Theory components
- Pre-use checks
- Operation methods
- Emergency procedures including "Emergency and Rescue plans"
- Capacities and limitations

- Selection & use of fall protection equipment
- Harness proof of inspection
- Categories of MEWPs
- Structural parts and considerations
- Familiarization and pre- use inspection
- Safe operating methods & hazards
- Theory test
- Component familiarization
- Checks prior to road travel
- Checking the route of intended use
- Set up
- Operation practice
- Typical work applications

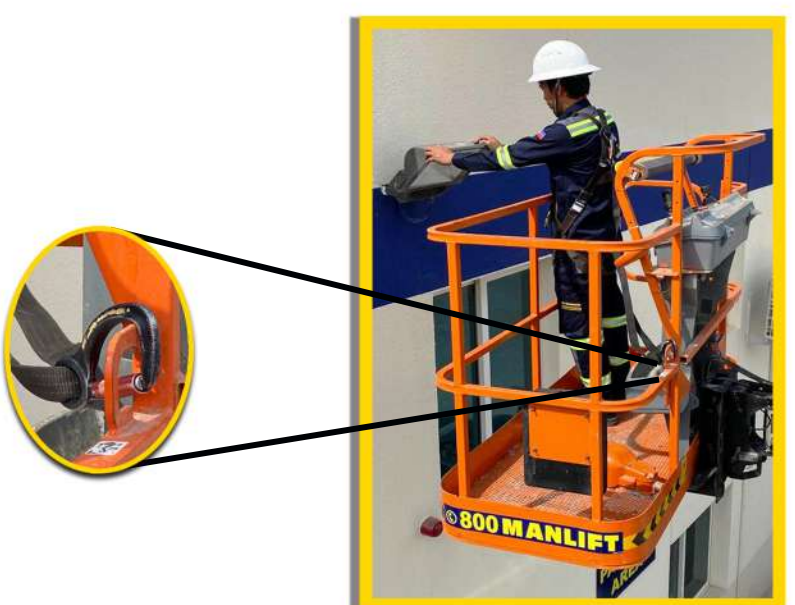
MEWP DEMONSTRATOR COURSE

This course revises all that is learnt as an operator and provides training to permit delivery of familiarization on any MEWP that the trainee has a "Powered Access license" for. Predominantly the "Demonstrator" will make operators familiar with the idiosyncrasies between different types of MEWPs. It includes responsibilities on pre-operational inspections, safe operating procedures, and also the limitations of MEWPs.

HARNESS & LANYARD SAFETY TRAINING

This course instructs a user how to select, inspect and use a full body harness and associated equipment safely when using a MEWP. (Course inclusions below)

- Health and safety regulation awareness
- Identify and select the correct PPE
- Harness checks and maintenance
- Correct fitment of harness and lanyard
- Theory
- Hazard analysis and risk assessment
- Hierarchy of fall protection measures
- IPAF harness statement
- Harness lanyard and fittings
- Harness types, Lanyard types
- Pre-use checks
- Usage and anchor points
- Storage and maintenance
- Hazards and precautions
- Rescue requirements
- Rescue options
- Assessment



OPERATOR COURSE OUTCOMES:

After successful completion of the course, Manlift will issue a completion certificate and Powered Access License (RFID - PAL Card) which is valid for 2 years. The PAL card from IPAF is recognized internationally.

Duration of course	1 day to 2 days depending on the trainee's ability levels.
Number of trainees	Maximum of 6 trainees for 1 category or of 4 trainees for 2 categories**
Harness training	½ day
MEWPs for Managers	1 day

POWERED ACCESS LICENSE (PAL) IS CATEGORIZED INTO VARIOUS TYPES AS BELOW:

Category 1a - IPAF Operator Training Static Vertical Personnel Lifts
Designed for those wishing to learn how to safely operate MEWPs, including any vertical personnel lift in which outriggers are deployed prior to elevation.

Category 1b - IPAF Operator Training Static Boom lifts
Designed for those wishing to learn how to safely operate MEWPs. This includes any booms type MEWPs with outriggers, whether they are powered or push around models that cannot be driven whilst elevated .e.g. Truck mounted boom lifts, Towable boom lifts and “Spider Lifts”.

Category 3a - IPAF Operator Training Mobile Vertical (scissor lifts)
Designed for those looking to learn how to safely operate MEWPs. This includes any scissor lifts and vertical lifts that may be driven whilst elevated (manufacturer specification permitting).

Category 3b - IPAF Operator Training Mobile Boom lifts
Designed for those looking to learn how to safely operate MEWPs, most often any boom lifts that do not have outriggers and so can be driven whilst elevated.

Category PAV - IPAF Operator Training “Push around vertical”
Designed for those looking to learn how to safely operate MEWPs, PAVs need to be “pushed” into position prior to elevation and can often be classified as “Low level access”.

MEWPS FOR MANAGERS

A one-day course delivered by a senior Manlift IPAF Instructor, for those who plan, supervise and manage and select the use of Mobile Elevating Work Platforms (MEWPs) in the workplace.

What you will learn?

This course is an overview of all things relating to MEWPs, including: planning, supervising and managing the use of MEWPs, and not about operating equipment. The course covers what managers need to know! About the safe use of MEWPs on site, from planning the job and conducting a risk assessment, to selecting the right equipment and eliminating or mitigating risks.

Who should attend the course?

Employers, project managers, foremen, safety practitioners, and supervising mangers, working in a broad range of industries such as construction, facilities management, retail and airports. Anyone who is responsible for planning, advising on and overseeing the use of MEWPs on their job site.

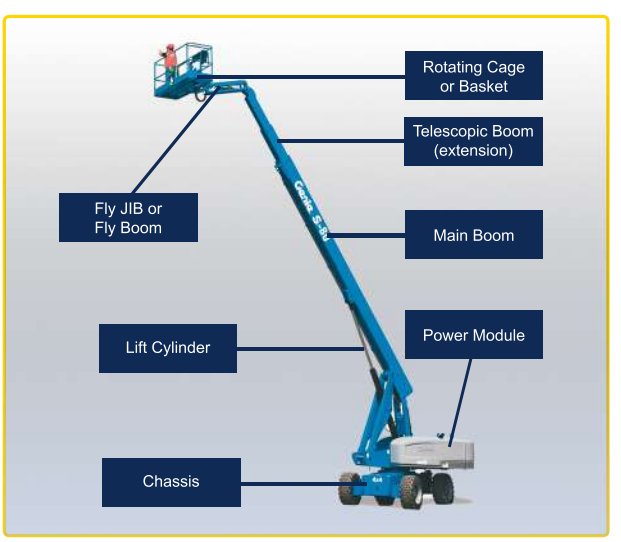
After successful completion of the course, Manlift will issue an IPAF certificate and add the MEWPs for Managers (MM) category to your PAL Card.

Duration of course	1 day
Number of trainees	Maximum of 10

Operate Legally and Safely!

MEWPs for Managers Course Program:

- MEWP legislation and guidance
- Different types of MEWPs knowledge
- Machine selection knowledge
- Selection of relevant PPE for an operator
- Increased knowledge on MEWP safe use & operation
- Awareness of misuse and abuse
- Awareness of planning and maintenance considerations
- Awareness of pre-use checks prior to work start
- Regulations relevant to MEWPs
- Knowledge of emergency procedure
- Awareness of capacities and limitations of MEWPs
- Correct selection and safe operation knowledge
- Knowledge on fall protection for MEWPs
- Rental terms and conditions
- What and operator should know
- Safety beyond training session
- Structural parts of MEWPs
- Safe operating methods and hazard awareness



LOAD AND UNLOAD TRAINING

Delivery drivers play a critical role:

The delivery process and the need for safe and correctly trained personnel can too often be overlooked.
Incidents involving the delivery process are well documented and can be avoided by the application of the knowledge gained during the “load / unload training” modules. The need for Competent assessed delivery drivers that have specific skills enabling them to safely handle and transport and secure MEWPs cannot be over emphasized.

What will you learn?

Candidates will be not only aware of accident prevention and control measures but also learn about the relevant health and safety legislation. Finally, candidates will be able to safely load, unload and secure different types of machinery onto the body of a suitable delivery vehicle ready for transportation safely and legally on the public highway and on the customer’s site.

Who should attend the course?

All applicants must have completed a recognized operator's course and should hold a valid MEWP Operator license for the relevant categories (e.g. 3a, 3b, 1b, 1a). Application should also hold current and relevant driving license for the type of vehicle to be loaded.

Instructors should hold a PAL card for the relevant type of plant, IPAF LOAD category on their instructor license and

Duration of course	1 day**
Number of trainees	Maximum of 4

After successful completion of the course, Manlift will issue an Operator card with load and unload category added to your license.
